

Class: Pre-Primary
Activity: Block Building Activity
Date: 2.5.2026

Activity Description: Fun Block Building Activity

A joyful and engaging Block Building Activity was conducted for the children within the school premises. The young learners enthusiastically explored colorful building blocks and created a variety of imaginative structures such as towers, houses, bridges, and unique designs.

The activity provided children with an opportunity to think creatively, experiment with different arrangements, and express their ideas through construction and play. While stacking and balancing the blocks carefully, the students remained actively involved and enjoyed learning together in a fun-filled environment. The session not only encouraged creativity but also promoted collaborative learning, communication, and joyful participation among peers.

Learning Outcomes:

- Strengthened fine motor skills and hand-eye coordination
- Enhanced creativity and imaginative thinking
- Developed problem-solving and critical thinking abilities
- Encouraged teamwork, sharing, and cooperation
- Improved concentration, patience, and spatial understanding
- Promoted confidence through independent exploration and creation
